PCP: Laura L Conger, MD

Phone Visit - Feb 07, 2025 (Ada)

with Bisrat A Fekadu at Maplewood Family Practice

Notes from care team

Progress Notes

Bisrat A Fekadu at 2/7/2025 3:32 PM

Subjective:

Today's visit with Ada was conducted via telehealth (video) as it is the patient's preference and it is appropriate for the treatment being provided

Positive strep tests 4 times in the last year. She also has a penicillin allergy. Father is wondering if she could be colonized with strep. She is currently being treated for an infection, finished azithromycin. She continues to have symptoms.

Objective:

There were no vitals taken for this visit.
Pleasant, no acute distress.

Assessment/Plan:

Recurrent streptococcal pharyngitis

- Otolaryngology Consult Adult/Peds
- Allergy And Immunology Consult Adult/Peds
- cefdinir (OMNICEF) 300 MG capsule; Take 1 Capsule (300 mg) by mouth two times a day for 5 days.

Recurrent strep:

Will treat with cefdinir, benefit outweighs risk. Discussed close monitoring for any signs of allergy. Discussed at length the options for evaluating this further. Referred to ENT for the opinion and management recommendations. Also referred to allergist to possibly desensitize for penicillin allergy.
